

HP Smart Cannot Find Printer – Resolved

Fix HP Smart Can't find Printer

Are you experiencing a problem where HP Smart cannot find your printer? Avoid getting hassled! We are here to fix your issue, and we will help you do it in no time!

HP Smart is a fabulous app for HP printers. You can perform all your printing, scanning, and file-sharing activities using this app. It can also be used for your printer setup and even for fixing issues. However, you might face some problems with HP Smart, and they might come out of the blue. One such issue that happens suddenly is the failure of HP Smart to find (or detect) your HP printer.

But chill! We'll analyze the causes of the issue and get HP Smart to find your printer.

Come On! Let's Begin Our Troubleshooting!

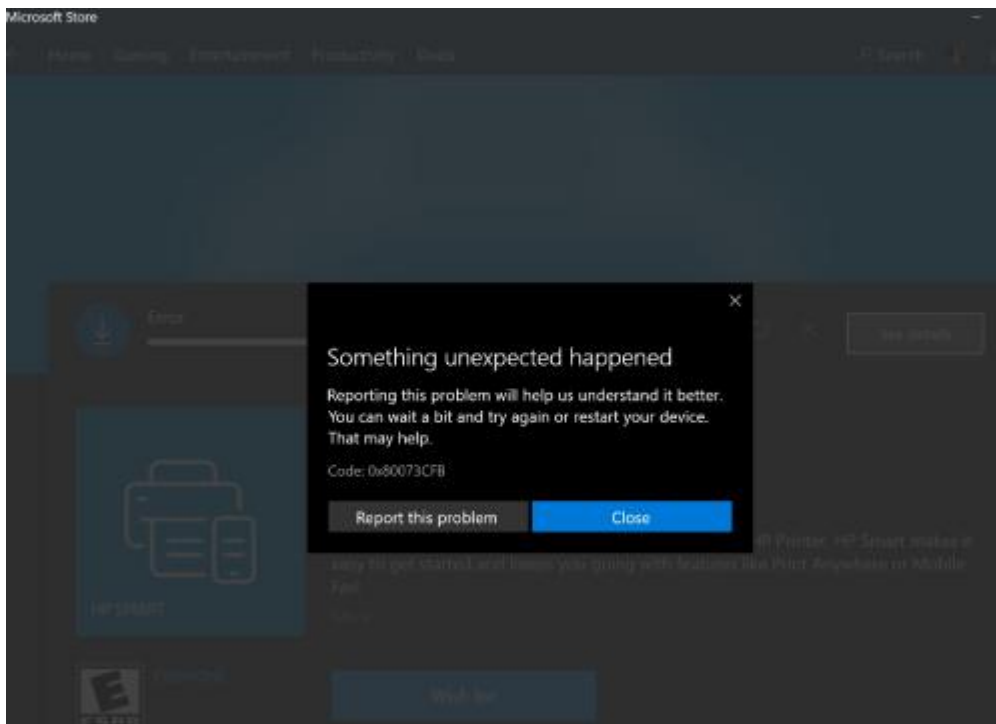

We take it that you have completed the hardware installation of your printer. You must have also got HP Smart installed on your computer or any other device you are using.

Under normal circumstances, when you try to add your printer to HP Smart, the app will recognize the printer right away. But in some situations, HP Smart cannot find your printer. Nevertheless, we can execute some simple methods to make HP Smart detect your printer. They are as follows.

Close And Re-Open HP Smart

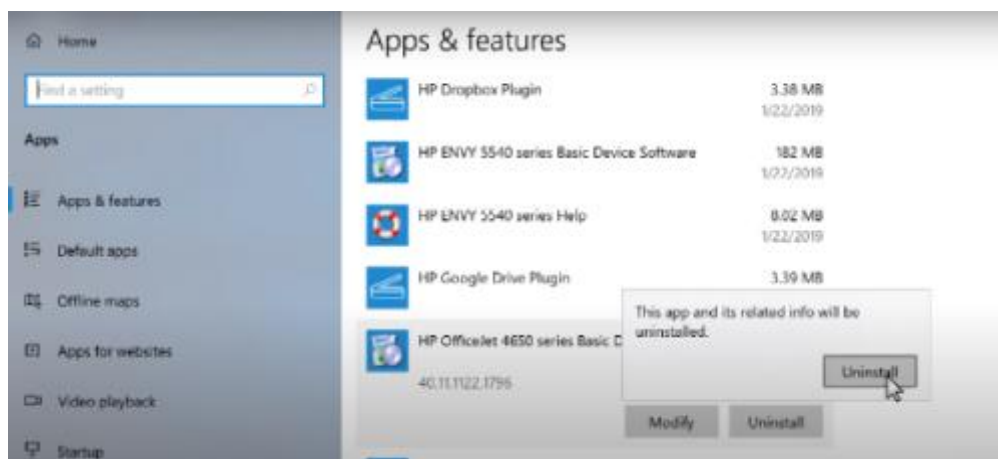

This is one of the highly popular methods of troubleshooting issues. Follow these instructions to execute it.

- If you have opened HP Smart, close it.
- Now, re-open the app.
- Try adding the printer to HP Smart.
- Does it find your HP printer now? If yes, that's truly awesome!
- If not, just move on to the method given below.

Uninstall And Reinstall HP Smart

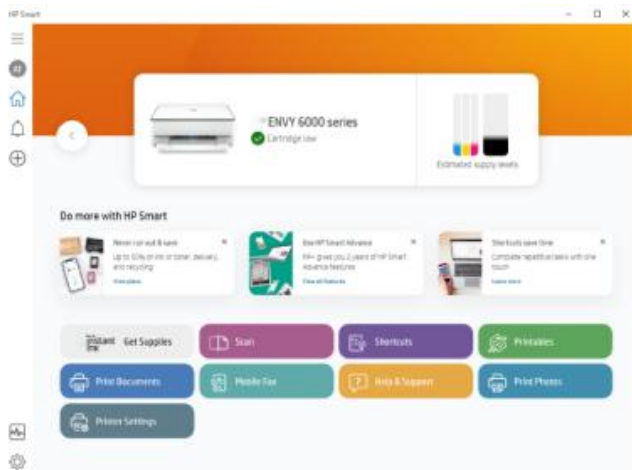

Problems with apps can be easily resolved by uninstalling and then reinstalling them. So do the same with your HP Smart app.

Have you done it? The issue should be fixed now. If not, move ahead with the method provided below.

Verify The HP Smart Version

- Check whether HP Smart is of the latest version. If not, just update the app to solve the problem where HP Smart cannot find your printer.
- Also, ensure that the version of the device OS (on which you've installed HP Smart) is the most recent one. Confirm that your device is compatible with the latest version of HP Smart.
- Once you've got the latest versions of both HP Smart and your device's OS, try adding your printer to HP Smart.
- Does the app detect your HP printer? By now, the problem should be solved, and the app must be able to find your printer.

The Right Way To Fix HP Smart

On this page, we've explained the methods to fix HP Smart Cannot Find Printer. We sincerely hope that your HP Smart issue is solved within minutes. From now on, you can begin printing or scanning using your printer with the help of the [HP Smart app](#).
